

Section2 > Matching bandwidth	556 Fit
Chapter1 > 0 > C:\Users\ben\Desktop\Power20150.pdf	567 Fit
Section2 > Double Stub Matching (1)	57 Fit
Chapter1 > 1 Double Stub Matching (1)	58 Fit
Section2 > Standing wave ratio in transmission lines	544
Chapter1 > 2 Sec1100.01 (1)	544
Section2 > Standing wave ratio in a lossless transmission line	544
Chapter1 > 3 Sec1103.03 (2)	544
Section2 > Standing wave ratio in a lossy transmission line	544
Chapter1 > 4 Sec1104 (3)	544
Section2 > Complex Power and Standing Wave Ratio	544
Chapter1 > 5 Sec1105 (2)	544
Section2 > Localized Diagrams for Pulse Excitation	544
Chapter1 > 6 Sec1106 (1)	544
Section2 > Standing wave ratio (Reflection Coefficient) Measurements	544
Chapter1 > 7 Sec1107 (1)	544
Section2 > Time domain reflectometry (TDR)	544
Chapter1 > 8 smithchart (1)	544
Section2 > Special loads and Powers	544
Chapter1 > 9 Transient analysis (1)	544
Section2 > Comprehensive Introduction	544
Section2 > Double-stub Matching	Fit
Section2 > Experimental determination of	Fit
Section2 > Transmission Lines	Fit
Section2 > Numerical Example	Fit
Section2 > Conducting wire vs. transmission lines	Fit
Section2 > Power between two lines	13 Fit
Section2 > Transmission lines	Fit
Section2 > Maximum voltage excursion	Fit
Section2 > Telegraph and Transmission Lines	Fit
Section2 > Power flow in transmission lines	Fit
Section2 > Development of transmission line theory	Fit
Section2 > Applications of transmission lines	Fit
Section2 > Uniform Plane Electromagnetic Waves, Voltage and Current Waves along Transmission Lines	Fit
Section2 > Power transfer of multi-sections	Fit
Section2 > Waves in Free Space	Fit
Section2 > Uniform Plane Waves	Fit
Section2 > Transformation among G and z	Fit
Section2 > Solution form of uniform plane waves	Fit
Section2 > EXAMPLE 1.4	Fit
Section2 > Harmonic wave equation and solutions	Fit
Section2 > Parallel plate line	Fit
Section2 > The Smith Chart	Fit
Section2 > Several Types of Transmission Lines	Fit
Section2 > Smith Chart	Fit
Section2 > Smith Chart: A homogram for math calculations	Fit
Section2 > Electromagnetic waves and propagation in a space with conducting wires: Electric circuits and curr	Fit
Section2 > EXAMPLE 1.5	Fit
Section2 > General Transmission Lines	Fit
Section2 > Types of Transmission Lines	Fit
Section2 > Transmission Line Matching	Fit
Section2 > Distributed equivalent circuit	Fit
Section2 > Quarter-Wave Transformer	Fit
Section2 > Lossy or General Transmission Lines	Fit
Section2 > Quarter-wave transformer matching technique	Fit
Section2 > Example	Fit
Section2 > Frequency response and bandwidth	Fit~39 Fit
Section2 > Transmission line equations with harmonic time dependence	Fit
Section2 > Voltage waves and current waves	Fit~102 Fit
Section2 > Bilateral Transformation	Fit
Section2 > Characteristic impedance	Fit
Section2 > Mismatch of a quarter-wave transformer	Fit
Section2 > Lossless Line ( $R = 0 = G$ )	Fit
Section2 > Distortionless Line ( $R/L = G/G$ )	Fit
Section2 > Example 7.7 Application of the Smith chart to transformation across a discontinuity	Fit
Section2 > Lossless Transmission Lines	Fit
Section2 > Single Stub Matching	Fit
Section2 > Input Impedance, Standing Wave Ratio, and Power	Fit
Section2 > Shorted Stub	Fit
Section2 > Single Stub Tuner (Matching): Using Smith Chart	Fit~109 Fit
Section2 > Lossless solutions in the sinusoidal steady state	Fit
Section2 > Single Stub Tuner (Matching): Using Smith Chart	Fit
Section2 > General solutions in the sinusoidal steady state and Line impedance	Fit
Section2 > Transmission line circuit and Reflection coefficients	Fit
Section2 > Single Stub Tuner (Matching)	Fit
Section2 > Reflection coefficients	Fit
Section2 > Single Stub Tuner (Matching): analytical method	Fit
